

INTRODUCING OUR NEW EXHIBITION - 'WATER'

May 31st to July 12th 2024.

Water is the foundation for life because it nurtures, but it is an element almost always in flux. It has the power to give and sustain life and to carry pieces of the planet, including humanity, from here to there.

It also has the power to flood and destroy with massive turbulent strength. All the biochemical processes which occur in plants, animals and our surroundings etc., require water to function. Life on earth requires its existence. We cannot imagine ourselves without the presence of water.

Life on earth was birthed from the waters, and water in its many forms and depictions evoke our emotions.

Water has memory. Water makes us all one. Our wonderful Seychellois artists have produced some great works related to water.

COME AND SEE!

Unit G4 Eden Plaza, Eden Island, Seychelles
